

Why Partner with AVANAN?

More Secure Clients

In less than 5 minutes, MSPs can deploy industry-leading cloud email and collaboration security from Avanan to stop phishing, malware, and data loss.

Avanan integrates with workplace collaboration suites like Office 365, G Suite, Slack, and Dropbox from the inside via APIs. Once installed, Avanan detects phishing, malware, and anomalous behavior. It learns communication patterns between users at an organization, and their roles.

The Avanan MSP management portal aggregates the data you need to manage your clients. Gain global visibility in the multi-tenancy view, and manage your business more efficiently.

Security Built for the Cloud

Avanan is cost-effective, intuitive, and easy to use.

Moments after the turnkey deployment, you'll enjoy a seamless and simple experience protecting clients from business email compromise, account takeover, and other targeted cyberattacks. Our product and team of experts will help you achieve scale, recurring revenue, and high margins.

Trusted Cloud Security Experts

Avanan protects millions of mailboxes around the world. This global footprint gives our AI and security researchers insight into innovative attack methods designed to compromise cloud environments. The intelligence and usability of the Avanan platform impress customers in all verticals, who awarded Avanan the distinction of Gartner Peer Insights Customers' Choice for Email Security.

"Avanan has filtered out almost all of the phishing attempts we were getting daily. It has really helped my peace of mind. No email hacks since implementation."

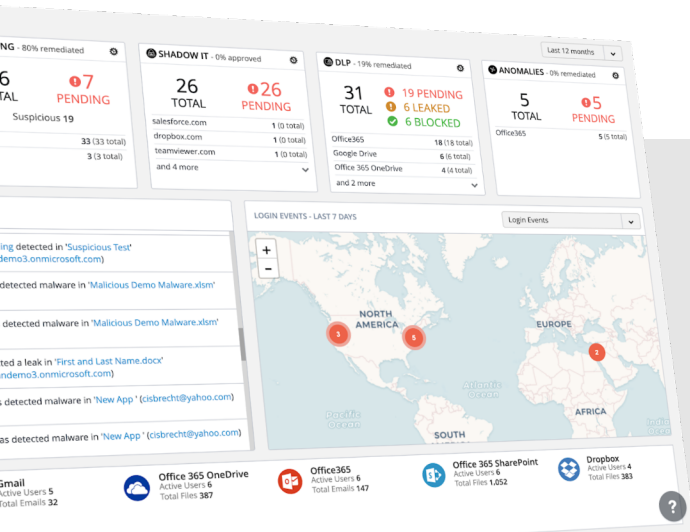

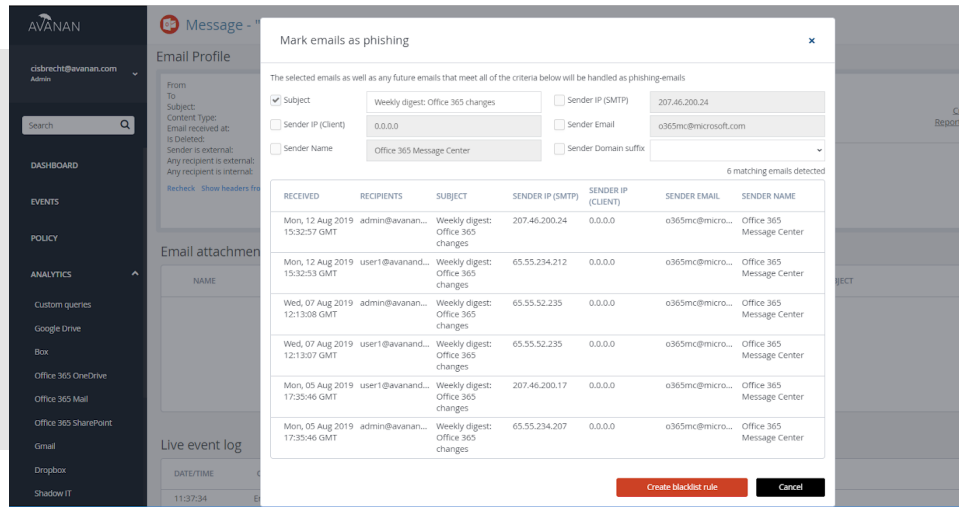

— Aaron Phillips, CTO at Outbound Technologies

Enablement and Onboarding

Avanan supports new partners with personalized onboarding and reliable resources. Our team provides sales and technical training, and you'll receive guidance from a dedicated Avanan expert. With 24/7 global support, Avanan guarantees fast response and the assurance that customers come first.

Unified Partner Portal for All Your Clients

Manage all your clients' email security in one multi-tenancy view. The single-pane-of-glass display shows your total users and licensed users so you can deliver the best possible security to those who need it. To enable a better management experience, Avanan provides licensing and single-sign on (SSO) tools, and automatically generates reports on customer activity.

Grow with Avanan

"We are selling more and more of your product, and love how it fits with our 365 customers. It's single handedly taken care of the phishing issues — among other things! Extra recurring revenue doesn't hurt either!"

— Daniel Bender, NetManageIT

Quick, Simple Sales Cycles and Above-Market Margins

Avanan is easy to demo and sell so you can accelerate your sales cycle. Because the platform is activated in one click, you're able to start POCs instantly — often during the first meeting.

Not only does Avanan fit your MSP pricing model, but you'll see sizable savings in resources to manage your day-to-day. Avanan offers comprehensive support to any size client; we're happy to schedule meetings, demos, and POCs until your team is self-sufficient.

We guarantee simple sales cycles and powerful results. Become an Avanan Managed Service Provider and channel partner today.
